Solutions Consultant

Agenda

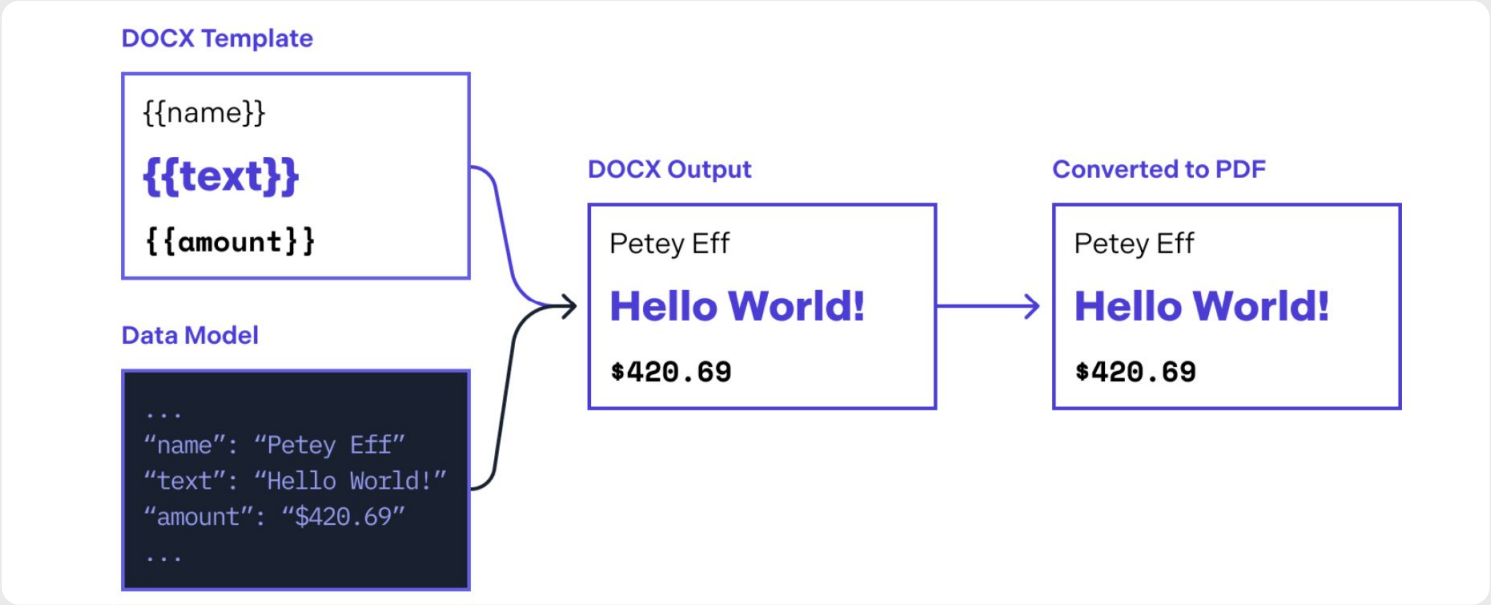
- General principles
- Populating a Word template
- Grids and template
- Demonstration

General principles

Templating consists of the following elements:

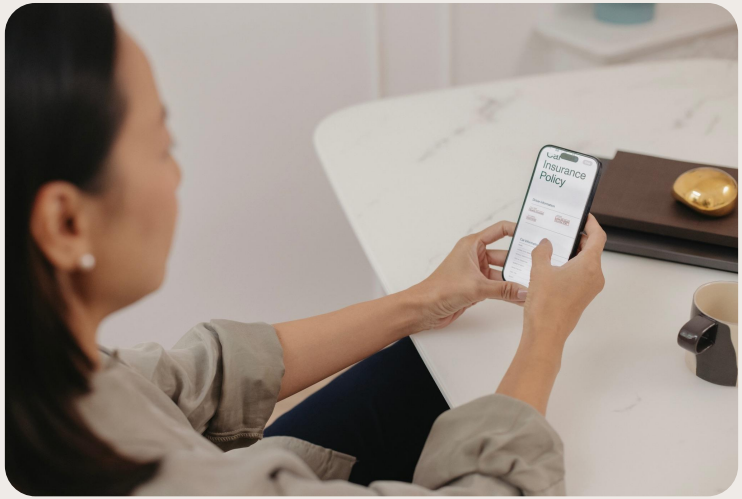
- A DOCX file that will be used as the template.
- A template model that contains the placeholder values to replace in the DOCX template.
- Configuration for the template and model.
- How to Map text-based questions (Short Text, Calendar, Search Box, etc.)
- How to Map multi-option questions (Checkbox, Radio Button, Select List)

Populating a Word template



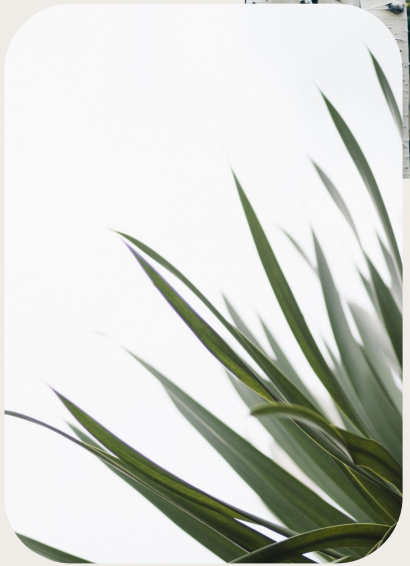
Demonstration:

- Prepare the DOCX template with placeholders
- Configure the Office Templating action.



The Grid Question

- Configuring the Grid
- How to Map a Grid
- How to Map a Footer in a grid to a total



Grid JavaScript

- JavaScript with Grid(Calculate %20 on Total).
- Grid to Complex Table.
- Grid to Sections.
- Rich Text Box to Grid(Bonus!!!)

Thank You!
